

Shelters Solutions

Shelter RG12

The Shelter RG is a strong and stylish outdoor shelter with a modern open design. It is made from high-quality steel, making it stable, durable, and suitable for public, commercial, and industrial locations. The steel frame is hot-dip galvanised to help prevent rust and is finished with a tough powder coating in a color of your choice. This provides excellent protection against the weather and keeps the shelter looking good for many years. The shelter is fitted as standard with clear tempered safety glass (ESG) side panels and a laminated safety glass (VSG) roof. For projects where side glazing is not required, the shelter can also be purchased without the side glass panels. The glass panels allow plenty of natural light into the shelter, creating a bright and open space. For extra comfort, the shelter can be fitted with an LED light in the roof. An optional radiant heater is also available to provide warmth during colder weather.

- Modern pavilion-style outdoor shelter
- Robust hot-dip galvanised steel construction
- Continuous roof gutter with drainage through support posts
- Rainwater discharged via discreet spouts above ground level
- Clear 8 mm thick ESG tempered safety glass panel
- Includes 6 glass holders for installation

Technical Data	
R&R Item Number	RR103813
EAN / GTIN	7350168263490
Product Type	Shelter RG
Height	3027 mm
Depth	3300 mm
Width	3300 mm
Weight	-
Clear Height	2376 mm
Drainage	Via spouts
Roof Cover	Laminated safety glass (VSG)
Roof Color	-
Back Wall Type	Tempered safety glass (ESG)
Side Wall Type	Tempered safety glass (ESG)
Profiles Material	Steel
Profile Color	RAL 7016 - Anthracite grey
Surface	Galvanised & powder-coated
Capacity	12 persons
Max. Snow Load	2,40 kn/qm
Construction	Screwed / assembly kit
